

Module 3

Rsquared Academy

27/03/2020

Practice Questions

- compute the length of a vacation which begins on `2020-04-19` and ends on `2020-04-25`
- recompute the length of the vacation after shifting the vacation start and end date by 10 days and 2 weeks
- compute the days to settle invoice and days overdue from the `receivables.csv` data set
- compute the length of employment (only for those employees who have been terminated) from the `hr-data.csv` data set (use date of hire and termination)
